The Home team provides the official scorekeeper and they use the large carbon copy scoresheet that includes 3 games on one page. The Visiting team provides a backup scorekeeper and they just use a paper sheet for each individual game. Fill out the following information ahead of time: grade, mark if the match is Girls or Boys, name of the gym, date, scheduled start time, referee name, umpire name, and the game number.

Once the coin toss has been completed, the referee will tell you which team is on which side of the court and who will be serving first. The two halves of the scoresheet mimic how you are looking at the court from the scorer's table, so you will write each team's name on their side of the court and then you will mark a "X" inside the First Serve box on the side of the team that will be serving first.

On the team rosters, the Roman numerals I through VI match up with the serving order 1 through 6 on the scoresheet. Just copy the player numbers over to the scoresheet and make sure that one player on each team is shown with a "c" because they are the captain. Towards the bottom of the scoresheet inside the Substitutions rectangle, make sure that you list the other players on the roster that are not starting this game. This information will help the referee later when they check to make sure that every player has played at least one complete game without being subsituted for.

Our Lady of the Presentation serves first with OLP#2 (Our Lady of the Presentation Player #2) and the serve the ball into the net. That results in Holy Family winning the point. First, mark a "sideways T" in the box next to OLP#2 because that means they lost a point when they served the ball. Next, move over to the Holy Family side and write the number one with a box around it. The box always means that you won a point that the other team served, and the one is because it was the first point that Holy Family won. Finally, go to the middle of the scoresheet and draw a line through the number one on the Holy Family side. The score is currently HF=1 and OLP=0.

Holy Family player #8 (HF#8) will be that team's first actual server, so they rotate to the serving line and serve. HF#8 serves a ball in and wins a point for Holy Family. Write a "2" in the square directly to the right of the "1 with a box around it" because HF#8 just won the second point for Holy Family. Then draw a line through the "2" in the middle of the score sheet on the Holy Family side. HF#8 serves again and scores a third point for Holy Family, so follow the same steps for the third point. HF#8 now serves the ball into the net, so you draw a "sideways T" to right of the third point because that is the symbol for the server losing their serve. The next serving playing for the other team gets credit for that point with a box around that point. That next player for Our Lady of the Presentation is player #42, so find their line and write a "1 with a box around it" and then line through point 1 towards the middle of the score sheet. That is the first point for OLP. The score is currently HF=3 and OLP=1.

S- Substitution serving team												Sx - Substitution receiving team																									

Holy Family player #42 (their captain with a "c" next to their number) servers six straight times and Holy Family wins all six rallies and the next six points. To the right OLP#42 and the "1 with a box around it" you will write a "2" for the second point then cross through the "2" in the middle of the scoresheet; then with the third point you will write a "3" and then cross through the "3" in the middle of the scoresheet; repeat these steps for points 4, 5, 6, and 7 when opposing team Holy Family calls a timeout. Immediately to the right of point 7, write down the symbol for a timeout by the opponent (you can always find the definition key towards the bottom of the score sheet). The correct symbol for an opponent time-out is "TX". Next to the "TX" write the current score in the form of a fraction with the top number always being the score of the team that called the time-out (in this instance 3/7). Finally, at the bottom center of the score sheet, fill in the score "3-7" under the score of the team that called the time out. This step is very important because once a team calls two time-outs and fills up these two rectangles, they are out of time-outs.

S- Substitution serving team														Sx - Substitution receiving team																													

After the time-out ends, the receiving team (Holy Family) decides to substitute player #10 for player #27. On the Holy Family side of the score sheet, you will line through player #27 and then write "10" right next to that lined-out number. On the Our Lady of the Presentation side of the score sheet, find where the serve is still going on (OLP#42c) and write down "Sx" because that is the symbol for a substitution by the receiving team. Next to that symbol write down in the form of a fraction the player going in on top and the player leaving on the bottom (10/27). The score is still HF=3 and OLP=7.

S- Substitution serving team												Sx - Substitution receiving team																									

OLP #42c is still serving so when they serve two more balls in and score two more points, write "8" to the right of the "10/27" and then go the next line down to write point "9" directly under the "1 with a box around it". Always remember to go back to the middle of the score sheet and line through the score there too. OLP#42c finally serves a ball out of bounds so the symbol for a player's serve ending is always a "sideways T" and the player on the opposing team who is the next server gets credit for a point with a box around it (a "4" with a box around it next to HF#14c). HF#14c serves the ball in and wins point 5 for Holy Family. Write that point down and line through the same point towards the middle of the score sheet. HF#14c serves the next point into the net, so "sideways T" next to HF#14c point 5 and the next OLP server gets credit for point 10 with a box around it. That player would be OLP#44 and once you line through the correct number at the center of the score sheet, you should see a score of HF=5 and OLP=10.

Holy Family player #10 is now serving and wins points 7 and 8, so you write them down and line through those same numbers at the center of the scoresheet. OLP decideds to substitute player #22 for #1, so you write "Sx" in the box and then the player coming in on top of the fraction (22/1). On the OLP side of the scoresheet you line through player #1 and write the new player "22" directly next to the old player number. HF#10 wins point 9 then OLP calls a time-out. The score is recorded at the bottom of the scoresheet with team who called the time-out first, so "10-9" and "Tx" with a "10/9". HF#10 proceeds to win points 10 and 11 before finally serving the ball into the net, so "sideways T" and the next server will be OLP#45 with the score tied at 11-11.

OLP#45 then serves and wins points 12 and 13 (ignore the marks between 12 and 13, those were just typo mistakes). OLP#45 then serves again, but loses the rally so the next server for Holy Family (HF#31) gets credit for their point 12 with a box around it. HF#31 then serves and wins points 13, 14, and 15 before OLP calls their second (and last time-out). Write down "Tx" for the opponent calling the time-out and the score according to the opponent, which would be "13-15". OLP has no more time-outs because both of their time-out rectangles are filled. Coming out of the time-out, HF#31 serves the ball into the net, so "sideways T" for losing serve and OLP#22 gets point 14 with a box around it. With OLP#22 getting ready to serve it is now OLP=14 and HF=15.

Our Lady of the Presentation now decides to sub OLP#1 back in to replace OLP#22, so you line through #22 and write down #1 next to them. Next you write "S" because the serving team is substituting and then "1/22" because OLP#1 is replacing OLP#22. OLP#1 serves and wins point 15, but then serves the next ball into the net, so "sideways T" for losing serve and HF#29 gets point 16 with a box around it. HF#29 serves and wins points 17 and 18 before losing the next rally, so "sideways T" for HF#29 and OLP#32 gets point 16 with a box around it. OLP#32 serves the ball long and out of bounds, so "sideways T" and HF#7 wins point 19 with a box around it. The score is now HF=19 and OLP=16 with Holy Family player #7 getting ready to serve.

HF#7 serves the ball out of bounds, so "sideways T" next to them and OLP#2 (the first server of the match) gets point 17 with a box around the 17. You write this 17 with a box around it just to the right of the "sideways T" that was written after they lost their serve the last time through the order. OLP#2 wins one point (point 18) before losing the next rally, so "sideways T" and HF#8 gets credit for winning their point 20 with a box around it. Holy Family player #8 is now serving game point and the score is HF=20 and OLP=18. Holy Family player #8 serves the ball in and Holy Family wins the rally for point 21. Write down point 21 and remember to line through the "21" in the center of the scoresheet . Finally, towards the bottom of the center of the scoresheet write down the final score (directly above the Time-Out section). The final score is 21 to 18.
